engcon's products attracted great Interest at BAUMA

16 April 2025 by Engcon

- engcon showcased its innovative products at BAUMA, the largest industry exhibition held in Munich from April 7th to 13th.
- The world premiere of the EC309, the second model in engcon's 3rd generation of tiltrotators, took place at the event.
- Mark Lisman, engcon's Regional Director for Europe, highlighted the significant interest in the EC309 and EC319 models, which offer notable fuel savings.
- engcon's live demonstrations at BAUMA helped increase understanding of tiltrotators' profitability and showcased their growing importance in Europe.

- To continue the momentum, engcon announced the "engcon Dig Days" tour, starting in Austria on April 25-26, to demonstrate tiltrotator benefits across five European countries.

From April 7th to 13th, this year's largest industry exhibition, BAUMA in Munich, took place. engcon was present to showcase its innovative products. During the week, world premiere of the EC309 took place– the second model in engcon's 3rd generation of tiltrotators.

Mark Lisman, engcon's Regional Director for Europe, is very pleased with engcon's participation.

The interest in our products was great, especially for the EC309 and EC319, which belong to our third generation that offers significant fuel savings compared to our second generation. Having the opportunity to demonstrate our products live helps to increase understanding of how the tiltrotator works and how it can improve profitability. We are pleased to note that tiltrotators were visible almost everywhere at BAUMA. The presence shows the increased importance and spread of the tiltrotator, especially in Germany and the rest of Europe. engcon was represented by many dealers and excavator brands, which demonstrates engcon's leading position in the industry, says Mark Lisman.

To build on the success from BAUMA, engcon is presenting an extensive digging tour; engcon Dig Days. During the tour, we will visit five different countries around Europe to meet our end customers on their home turf and demonstrate all the benefits of the tiltrotator. The first stop will be in Austria on April 25-26.
