Check the full list of new heavy machinery models presented by manufacturers during March 2025! Are you particularly interested in any of these highlights? Maybe **MEILLER**'s trailers, **HG Machine**'s dumpers, or **Alimak Group**'s work platforms? Let us know at press@lectura.de! [Read more >>](#)

Volvo CE empowers operators with expansion of productivity-boosting digital tools

Volvo CE empowers operators with expansion of productivity-boosting digital tools

IMAGE SOURCE: Volvo CE

Volvo Construction Equipment Volvo CE has launched a series of new digital solutions aimed at enhancing operator productivity, safety, and efficiency, showcased at Bauma 2025. These updates include enhancements to the Dig Assist portfolio with features like Lift Assist, Operator Coaching, Topcon 3D Machine Control integration, and Attachment Detection, which improve jobsite accuracy and coordination. Additionally, Volvo CE introduced the Load Ticket solution to streamline invoicing processes for wheel loader operators by facilitating real-time digital flow from machines to offices. These innovations underscore **Volvo CE's** commitment to digital innovation and customer-centered solutions in the heavy machinery sector. [Read more >>](#)

World Premiere at bauma 2025: The New PALFINGER PK 880 TEC Punches Above its Weight

The PK 880 TEC loader crane premieres at bauma. With its advanced design, cutting-edge technology and peak precision, it punches above its weight.

IMAGE SOURCE: PALFINGER

Advanced design, cutting-edge technology and peak precision: On the first day of bauma 2025, **PALFINGER** unveils the new PK 880 TEC loader crane that will become available for order in June. Its capabilities make the PK 880 TEC stand out from its performance class with its impressive lifting power. Smart assistance systems increase efficiency and operator comfort, while its sensitive control system ensures top precision.

TOBROCO-GIANT wins lawsuit against Chinese manufacturer at bauma 2025

From left to right: Frans van Asseldonk (Sales), Toine Brock (CEO), Fabio Adinolfi (Attorney), and Pim de Boer (Marketing)

IMAGE SOURCE: TOBROCO-GIANT

TOBROCO-GIANT secured a legal victory at the bauma 2025 exhibition in Munich when the court ruled in summary proceedings that a Chinese manufacturer displaying an unauthorized copy of the GIANT G2700 must immediately remove their machine from the exhibition grounds. This outcome emphasizes the protection of intellectual property rights on an international stage, highlighting the consequences of copying products that have taken extensive development and innovation efforts. **TOBROCO-GIANT's** CEO, Toine Brock, stressed the importance of safeguarding their high-quality machine innovations and asserted that such rulings provide a strong legal framework for future actions against any infringements. The ruling sends a clear message within the industry about the significance of respecting intellectual property. [Read more >>](#)

Sinoboom affirms global credentials at Bauma Munich

PL International X Sinoboom signing

IMAGE SOURCE: Sinoboom

Sinoboom demonstrated its global and European market strategies at Bauma Munich, showcasing a diverse range of MEWP products, including electric and diesel scissor lifts, articulating boom lifts, and the SPA27J spider lift. The company highlighted its "Made in Europe for Europe" approach with models manufactured at its Polish facility, underscoring a robust European supply chain. **Sinoboom** announced the acquisition of the Holland Lift brand, enhancing its portfolio with over 30 high-capacity scissor lift models. Additionally, **Sinoboom** established a UK subsidiary to strengthen its UK distribution network and signed a new dealer agreement with PL International to expand into the East African market. The company also introduced initiatives like Sinoboom Certified Used to improve the total cost of ownership and residual values of used

The Wirtgen Group attracts visitors from around the globe with the variety of its innovations at bauma 2025

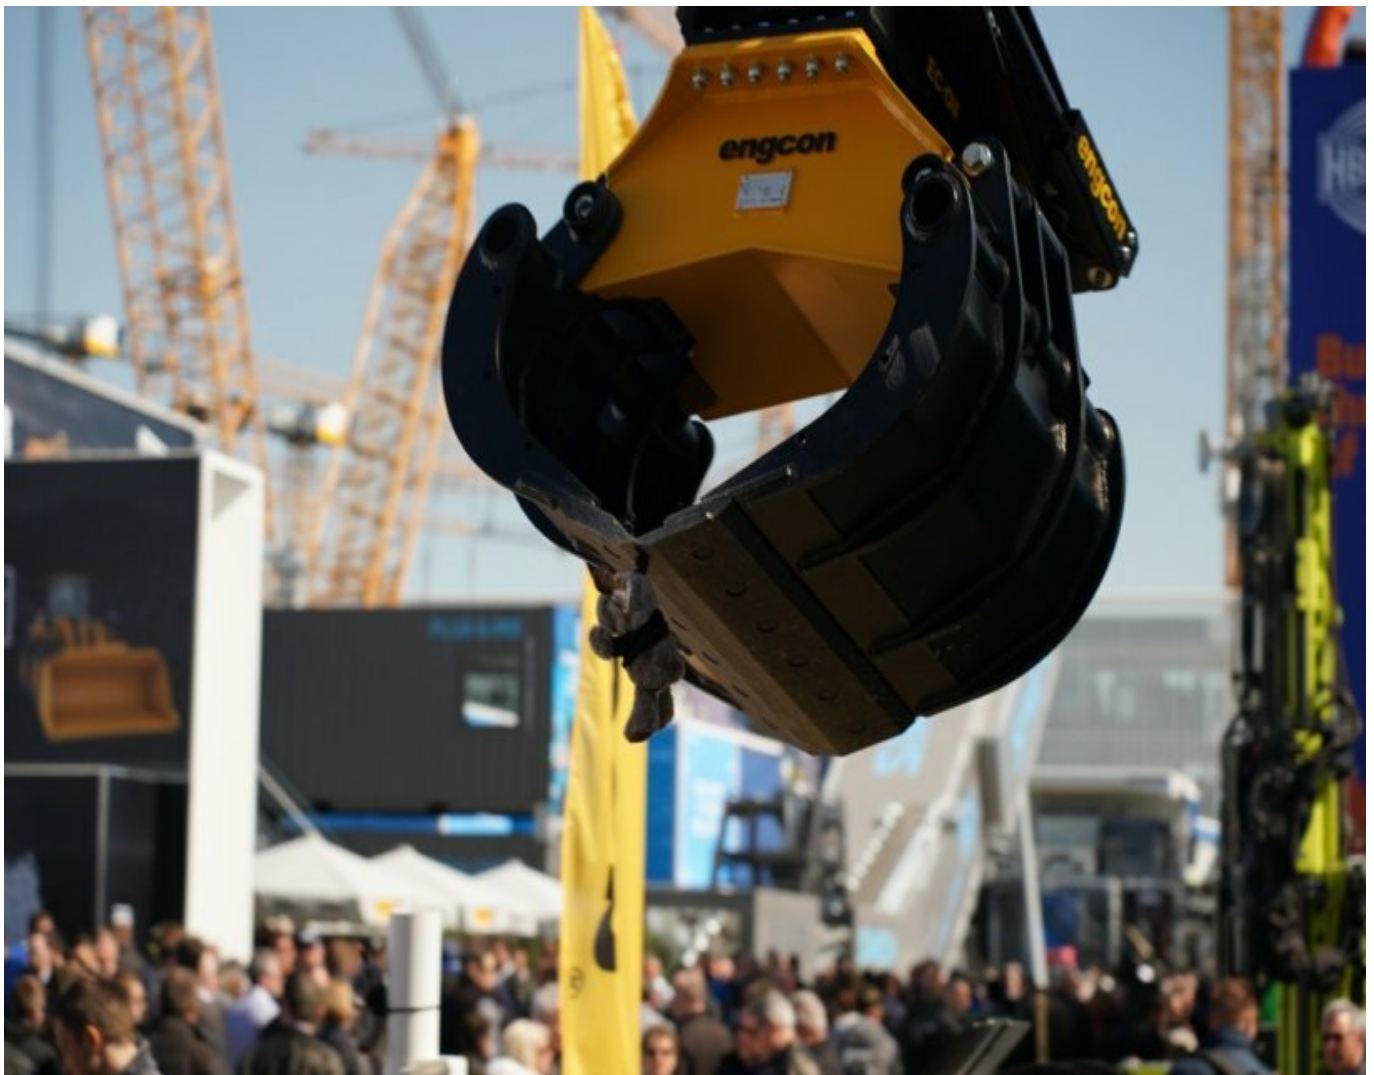

With 45 world premieres and innovations at Bauma 2025, the Wirtgen Group product brands presented themselves as reliable partners of their customers.

IMAGE SOURCE: WIRTMEN GROUP

The Wirtgen Group, in collaboration with **John Deere**, showcased a variety of innovations at the bauma 2025 exhibition, drawing global visitors with highlights including 45 world premieres and numerous technology presentations. These featured the debut of Wirtgen's most powerful large milling machine, the W 250 XF, and new wheeled cold recyclers and soil stabilizers. The Technology Zone highlighted **John Deere's** Operations

Center™ Construction and the new Wirtgen Group Performance Tracker, offering insights into digital solutions that facilitate construction management. Key exhibits included Vögele's, Hamm's, Kleemann's, and Benninghoven's reduced-temperature asphalt technologies. The exhibition underlined the importance of smart automation and production systems in enhancing precision, quality, and efficiency in construction projects. [Read more >>](#)

engcon's products attracted great Interest at bauma

engcon's products attracted great Interest at BAUMA

IMAGE SOURCE: engcon

Engcon showcased its latest innovations at the bauma exhibition in Munich, highlighting the world premiere of its EC309 tiltrotator, which is part of its third-generation offerings known for significant fuel savings. The

event ran from April 7-13 and saw notable interest in the EC309 and EC319 models. Engcon's live demonstrations emphasized the profitability and growing relevance of tiltrotators across Europe. To sustain this momentum, **Engcon** announced its "engcon Dig Days" tour to further demonstrate the benefits of tiltrotators in Austria and four other European countries, starting April 25-26. Hitachi presents the largest model in its Zaxis-7 wheeled excavator range at bauma

Hitachi ZX220W-7

IMAGE SOURCE: Hitachi

Hitachi introduced the ZX220W-7, its largest Zaxis-7 wheeled excavator, at Bauma, showcasing advanced features tailored for enhanced profitability, comfort, and safety. The excavator boasts the HIOS III hydraulic

system for better fuel economy and productivity, a redesigned cab to reduce noise and vibration, and a 270-degree bird's-eye camera system for improved safety. Built for durability with a robust undercarriage and easy maintenance, it also offers versatile attachment options. The ConSite and Owner's Site remote systems enable real-time fleet management, ensuring optimal uptime and operational efficiency. The model is expected to perform exceptionally across various applications with distinctive customer support throughout its lifecycle. [Read more >>](#)

Excavator attachments manufacturer TILTPRO Corp. joins the Open-S Alliance

Excavator attachments manufacturer TILTPRO Corp. joins the Open-S Alliance

IMAGE SOURCE: Steelwrist AB; Open-S Alliance AB

TILTPRO Corp., a Korean manufacturer specializing in rotating couplers, tilt couplers, and tiltrotators for excavators, has joined the Open-S Alliance. This organization promotes a standardized interface for automatic couplers that allows compatibility across different manufacturers, enhancing flexibility and safety. TILTPRO Corp.'s inclusion as an Associate member aligns with their focus on customer value and innovation, aiming to improve productivity with standardized, high-functionality quick couplers. This move supports the Alliance's mission to offer machine owners and contractors the freedom to interchange tools efficiently while adhering to safety standards. [Read more >>](#)

New Steep Slope Carriers

Tigercat LH857

IMAGE SOURCE: Tigercat

Tigercat has released two new track carrier models based on the new sloping tail platform for steep terrain harvesting operations. Both the L857 feller buncher and LH857 harvester are powered by the efficient Tigercat FPT N67 engine. Power is delivered to the track drives via a refined, efficient open loop hydraulic system, providing high tractive effort and excellent performance on steep slopes. [Read more >>](#)

Wates hails hydrogen as a sustainable fuel of the future

Wates hails hydrogen as a sustainable fuel of the future

IMAGE SOURCE: J. C. Bamford Excavators Ltd.

The company, one of the UK's leading family-owned development, building and property maintenance companies, has been trialling a JCB 60kVA hydrogen combustion generator on a site near Wolverhampton. Coupled with a 104kWh Powerpack battery storage unit, the intelligent combined power system can operate

on battery power alone, as a hybrid (using both battery and generator power), or hydrogen-powered only.
