50 Years of Fliegl – Diversity, Technology, Future

23 June 2025 by LECTURA GmbH

by Emmy Schröder

“Right Here, Right Now” – under this motto, Fliegl celebrated its 50th anniversary on May 22, 2025. Dealers, customers, and journalists from around the world were invited to look back together on the company's history, development, and future.

At the Fliegl Agro-Center in Kastl, the full range of products was on display – from construction and municipal technology to slurry logistics, landscaping equipment, and transport solutions. In addition to proven classics such as the SDS 390 push-off trailer and the Fliegl Cargos 250 forage transport wagon, several new innovations also took center stage: the compact 2527 yard loader stands out with its low center of gravity, easy maintenance, and quick coupling.

The efficient unloading is ensured thanks to its robust T-Rex high-tip bucket made of HB500 steel. The new SkateMaster 150 rounded off the line-up – a trailing slurry injector with working widths of up to 15 meters, compact transport dimensions, and an optimised folding mechanism.

In the afternoon, guests visited the Mühldorf site, where a factory tour provided fascinating insights into production processes and quality standards. The day concluded with a festive Bavarian-style evening featuring traditional music, local cuisine, and an impressive light show.

The event offered all participants valuable insights into Fliegl's innovative spirit and dedication – a promising outlook on the years of progress and growth to come.

Many thanks to **Fliegl** for the invitation and outstanding organisation – it was a pleasure to be part of this special anniversary and to experience the passion for technology, progress, and community firsthand.
