- NORD's extensive experience and know-how span over 100 industries, offering a comprehensive range of modular drive solutions.

- The company emphasizes customer proximity, providing short delivery times, consulting expertise, and direct on-site service.
- NORD's global presence includes significant production facilities in strategic markets, enhancing flexibility and efficiency in meeting local requirements.
- Key regional hubs include Waunakee in the USA, Nowa Sól in Poland, and Suzhou in China, each playing a crucial role in their respective economic areas.

Global network for production, service and sales With a global network that features locations for production, service, manufacturing and sales, NORD is a reliable partner for the industry! NORD has further strengthened its position as a leading developer and manufacturer of individual drive solutions. In addition to its headquarters in Bargteheide, the company has 48 subsidiaries on all continents. Around the world, NORD customers receive products and services with consistently high quality.

Decades of experience, extensive know-how in more than 100 industries, own production facilities, great production depth and a global network – worldwide, NORD offers its customers drive solutions from a comprehensive range of modular products. The proximity to customers is a key aspect for **NORD DRIVESYSTEMS**.

Benefits for NORD customers: short delivery times, consulting expertise and direct on-site service. Thanks to its global presence and own production in strategic markets, NORD understands the local requirements and offers flexible, efficient drive solutions. The great production depth, the global network and the wide range of products with gear units, motors and drive electronics form the basis for highest quality, customer proximity and fast response times – supported by a committed team.

48 own subsidiaries worldwide

For customers in the EMEA region, which comprises Europe, the Middle East and Africa, NORD is present with its own subsidiaries in 23 countries. Each of them take care of the on-site markets. Seven locations, including four in Germany as well as one in Italy and two in Poland, feature on-site production. These plants are part of the global production network and supply customers with high-quality drive solutions.

The Polish site in Nowa Sól is celebrating its 20th anniversary this year: The plant, which was founded in 2005, has a total operating area of more than 32,000 m² and has been continuously developed over the years.

In the economic area of North and South America, NORD has seven own sites – four of them in the USA with Waunakee in Wisconsin as the hub as well as with its own production facilities. Locations in Canada as well as Mexico and Brazil for the South American continent complete the network in America.

In the Asia-Pacific (APAC) economic region, NORD is represented with nine locations. The regional hub in Suzhou, China, which was founded in 2001, acts as the central hub. Further subsidiaries cover India, Singapore, Vietnam, South Korea, Indonesia, Malaysia and Australia.

The global presence is of major importance to the customer loyalty – not only in the field of sales and support. By having its own production facilities in all economic areas, the drive specialist has a further invaluable advantage in the face of tough international competition.
