Schwarzmüller at NUFAM 2025: “Driven by innovation. Built for the future”

1 September 2025 by Schwarzmüller

- Schwarzmüller Group will showcase innovative transport solutions at NUFAM 2025 under the motto “Driven by innovation. Built for the future.”
- The company will present practical vehicle concepts addressing cost-effectiveness, sustainability, and digital integration.
- Highlighted vehicles include the new 3-axle full aluminum segment tipper semitrailer and the extendable 3-axle RH100 flatbed semitrailer.

- **Schwarzmüller emphasizes close cooperation with customers to tailor vehicles to specific applications, focusing on cost-effectiveness, ease of use, and durability.**
- **Visitors to NUFAM 2025 can explore the latest vehicle solutions and consult with Schwarzmüller experts at the Karlsruhe Exhibition Center from September 25–28, 2025.**

Innovative transport solutions for tomorrow's challenges

At NUFAM 2025, the **Schwarzmüller Group** will present its response to the key challenges facing the construction and transport industry under the motto “Driven by innovation. Built for the future”: increasing demands on cost-effectiveness, sustainability, and digital integration. With a wide range of practical vehicle concepts, Schwarzmüller will demonstrate its strength as a specialist in customized and sustainable transport solutions.

Innovations from practice – for practice

For decades, Schwarzmüller has been developing vehicles that meet the high demands of everyday construction site work. Whether weight-optimized segment tipper semitrailer, intelligent platform solutions, or heavy-duty stanchion vehicles – every vehicle is based on close cooperation with users and decades of development experience.

“We don't see innovation as an end in itself, but as a tool for solving our customers' specific challenges. Our vehicles are developed in constant dialogue with our customers,” explains Ferdinand Hamedinger, product expert at the Schwarzmüller Group.

One example: the new 3-axle full aluminum segment tipper semitrailer impresses with its low weight, high durability, and efficient operation—ideal for bulk goods transport under economic pressure. Also on display at NUFAM is the extendable 3-axle RH100 flatbed semitrailer: designed for transporting building materials and construction machinery, it combines high payload capacity with a smart frame design and a wide range of lashing options.

Close to the customer – close to the solution

Close cooperation with freight forwarders, construction companies, and municipal utilities is an integral part of product development at Schwarzmüller. Each vehicle is tailored to the specific application.

"Our customers' requirements are changing – and we are developing our products along with them. The focus is on cost-effectiveness, ease of use, and durability," emphasizes Simon Richenhagen, Head of Marketing at the Schwarzmüller Group.

Experience it live at NUFAM 2025

Visitors to NUFAM 2025 can get a comprehensive overview of the latest vehicle solutions at the Schwarzmüller stand – from the new tipper trailer to container vehicles and walking-floor semitrailers. Experts in technology and sales will be available for one-on-one consultations, offering guidance and insights into the next steps toward the transport solutions of tomorrow.
