ANMOPYC 2025 International Press Reverse Mission

10 November 2025 by Anmopyc

- ANMOPYC, supported by ICEX, organizes an international press reverse mission to showcase Spanish machinery and technology.
- The event aims to promote the construction, public works, and mining equipment sectors globally.
- Media representatives from America and Asia participated, visiting multiple associated Spanish companies.
- ANMOPYC thanks the participating companies for their cooperation and detailed presentations during the visits.

Once again this year, **ANMOPYC**, with the support of ICEX, is organising a new international press reverse mission aimed at giving participating media outlets a first-hand look at the facilities, production processes and innovations of our member companies.

Through this activity, ANMOPYC aims to enhance and reinforce the image of Spanish machinery and equipment for construction, public works and mining worldwide, promote the sector as well as the experience of Spanish companies and the technology of their products, and highlight the quality of Spanish equipment.

In this edition, ANMOPYC had the pleasure of receive five magazines from countries of America and Asia and organized a tour through several associated companies that manufacture machinery and supply services and products for the construction and mining machinery sector.

ANMOPYC would like to express its sincere gratitude to all the companies participating in this activity for their time and attention during all the visits and for their willingness to show us in detail their products, production processes and projects in which they are involved.
