Shaktiman at Agritechnica 2025: New Launches and Bigger Presence in Hanover

21 November 2025 by Shaktiman

- Shaktiman expands its presence at Agritechnica 2025 with a 50% larger booth, signaling increased investment in European markets.
- The company introduces three new products focused on sustainable farming: Variable Chamber Round Baler, Twin Rotor Hay Rake, and In-Out Rotary Tiller.
- A broad range of agricultural machinery is showcased, including mowers, rotary tillers, forage harvesters, and power harrows, emphasizing versatility and field performance.

- Interactive booth activities and leadership engagement aim to foster partnerships and promote Shaktiman's vision for smart, accessible farm mechanization globally.

SHAKTIMAN (Tirth Agro Technology Pvt. Ltd.), one of India's leading agricultural machinery manufacturers, officially opens its expanded booth today at Agritechnica 2025 in Hanover, marking the start of a week-long showcase of innovation, growth, and commitment to sustainable farming.

Following its successful debut as an independent exhibitor in 2023, Shaktiman returns this year with a booth nearly 50% larger, reaffirming its growing investment in European markets and its ambition to become a key global player in agri-mechanization.

From 9 to 15 November, visitors to Hall 5, Booth B13 will have the opportunity to explore a wide range of equipment solutions, meet the company's leadership, and experience first-hand Shaktiman's commitment to farmer-centric innovation.

"Our participation at Agritechnica is about more than product display — it's about building long-term partnerships that drive sustainable agriculture across regions," said Mr. Ashwin Gohil, Chairman of Shaktiman. "We see Europe as a key part of our global growth story, and Agritechnica is the ideal platform to connect with forward-thinking customers."

This year's spotlight falls on three new product tailored for modern, sustainable farming systems: the **Variable Chamber Round Baler**, offering flexibility in bale size and density to reduce waste and simplify

handling; the **Twin Rotor Hay Rake**, designed for faster and more uniform raking compared to single rotor models; and the **In-Out Rotary Tiller**, built specifically for vineyards and orchards to enable effective mechanical weed control between rows without the use of herbicides.

In addition to these launches, Shaktiman presents a comprehensive portfolio of equipment categories that reflect its commitment to versatility and practical field performance. Highlights include the **Folding Flail Mower**, used for cutting and shredding grass, weeds, and light brush, offering fine mulching and safe operation for effective vegetation management; **SRT-6.0 MS Foldable Jumbo Rotary Tiller**, known for its soil pulverizing and leveling performance; and the **Forage Harvester** with 12 blades, a two-row machine designed to chop forage material uniformly while preserving crop nutrients for high-quality silage. The **EP250-600 Power Harrow** is also featured for fine soil preparation and improved crop efficiency.

Visitors can look forward to an interactive booth experience featuring live quizzes, giveaways, and opportunities to meet the leadership team. Shaktiman's experts will be available for technical discussions and collaboration throughout the event.

With its expanded presence and innovative range, Shaktiman positions Agritechnica 2025 as a milestone in its global growth journey. Farmers, partners, and media representatives are invited to Hall 5, Booth B13 to explore Shaktiman's latest solutions and discover the company's vision for the future of smart and accessible farm mechanization.
