Next-level performance: That doesn't compromise

6 March 2026 by Bobcat

- The Bobcat E20 compact excavator offers top performance in the 1-2 ton class with a zero-tail-swing design and retractable undercarriage for excellent maneuverability.
- It features enhanced lifting and digging power through a long arm, larger cylinders, and an optional counterweight.
- The machine provides smooth, precise hydraulic control with a load-sensing pump and closed-center system.
- Operator comfort is prioritized with premium controls, optional heated cab, LED lights, and easy access.

- Transport is simplified by improved lift points, tie-downs, and an automatic slew brake for hassle-free jobsite mobility.

The next-generation Bobcat E20 compact excavator delivers more where it matters

When you demand the best in a 1-2 ton excavator, the **Bobcat® E20** delivers as the highest-performing machine in its class. Its zero-tail-swing design, in-track swing frame, retractable undercarriage and long blade provide maximum maneuverability. This next-generation model pairs digging power, refined hydraulics and premium operator features in a slim, easy-to-transport design, helping you tackle every job with greater power, control and confidence.

Performance where it counts

Equipped with a standard long arm, the E20 delivers class-leading lifting and digging performance. Larger boom and blade cylinders paired with the longer retractable undercarriage and long blade deliver increased lifting capabilities without compromising maneuverability. The optional add-on counterweight further increases digging and lifting performance when your work demands more.

Efficient backfilling

Redesigned long blade with standard blade float and improved blade extensions provides improved material handling and increased maneuverability.

Smooth, responsive control

The E20's new load-sensing pump, paired with the closed-center hydraulic system, delivers smooth and responsive multifunctioning operations and controllability, along with precise positioning of the excavator and work group. You'll have more power and flexibility for traveling and operating the workgroup simultaneously.

Elevated operator experience

Experience all-day comfort and productivity with the E20's operator-focused design featuring standard LED lights. Premium joysticks with fingertip boom swing and auxiliary controls provide smooth, low-effort control, while improved steps and access points simplify entry and exit. An optional heated cab with a Bluetooth® radio, auto idle, auto shift, 3D grab handles and reduced noise levels enhances comfort.

Maneuverable. Transportable. Jobsite ready.

With the retractable undercarriage, zero-tail-swing design and in-track swing frame, you'll experience next-level jobsite maneuverability. The E20 also offers hassle-free transport to your next job with improved lift-

point locations, convenient tie-down points and an automatic slew brake.
