

New website for TVH

25 February 2014 by TVH

On 24 February TVH launched its new website, with the same well-known address www.tvh.com. With the slogan 'Fly high with our new website' the one-stop shop for material handling and industrial vehicles introduces its new site to its customers. As a result of the rapid growth in the last couple of years, during which TVH also tapped new markets, a new website became essential.

Visitors of the site first arrive on a landing page where they can select their country on a map of the world. Based on the selected country, they get the correct information and contact details. The new site currently exists in the following languages: Dutch, French, English, German, Spanish, Portuguese, Italian, Polish, Russian. The websites of the TVH branches will also receive an update during the next couple of months, so that all TVH websites will use the same layout in time.

More info, more images

On the new site TVH displays much more of its product range, with lots of visual material. The pages of the Parts & Accessories division clearly show what machines the company sells parts and accessories for, and what catalogues and brochures are available on these products. People who are interested in purchasing a machine now have a perfect overview of what machines are for sale on the pages of the Equipment division, with a direct link to the technical details.

Training Centre and Service & repair

As from now the overview of the technical and driver training courses can also be found on the site, and customers have the possibility to immediately enrol online. The pages about Service & repair explain what the Workshop service and Electronics departments do and for what repairs customers can contact TVH.

Movies, brochures, catalogues and webshops

The navigation on the site is very clear, but people who don't immediately find what they are looking for can use the search function to search through the entire site. And for those who have a question, they can use the 'Can we help you'-button on each web page in addition to the contact form. All catalogues, brochures and movies have been grouped under 'Downloads'.

As from now customers can also log on to the webshops MyTotalSource (ordering, requesting offers, looking up parts) and MyEquipmentFinder (looking up second-hand machines by stock level) via the site.

Working at TVH

In addition to the overview of the vacancies, anyone looking for a job at TVH can now find elaborate info about working at TVH, the company values and info about job fairs. The pages about the company also clearly show how the company has grown, where the international branches are and what the mission of the company is.
