HIDROMEK will be at SaMoTer 2026, a major event in the Italian construction machinery market!

4 May 2026 by HIDROMEK

- HIDROMEK will participate in SaMoTer 2026, a prominent construction machinery fair in Verona, Italy, held from May 6–9.
- The company will showcase a range of excavators and backhoe loaders, including two new short-tail crawler excavator models designed for narrow and urban work sites.
- HIDROMEK emphasizes its strong market presence in Italy, supported by 13 authorized dealers and a growing European export strategy.

- The event serves as a key platform for HİDROMEK to engage with customers, dealers, and explore potential partnerships in the region.

HİDROMEK, which has drawn attention with its busy event schedule both domestically and internationally, is preparing to participate in **SaMoTer 2026**, set to take place in Verona, Italy, from May 6–9.

SaMoTer 2026, which is counting down the days until it opens its doors for the 32nd time, stands out as one of the most important and long-standing events in Italy's construction equipment market. Held every three years in the city of Verona, this year's fair will take place from May 6–9 at the Veronafiore Exhibition Center. At its last edition in 2023, SaMoTer welcomed nearly 42.000 visitors from 91 different countries and hosted 536 exhibitors.

HİDROMEK, which continues to participate in major events across the world in the construction machinery sector and recently wrapped up a highly successful trade show in Spain, will next head to Italy. HİDROMEK, which is finalizing its preparations for SaMoTer 2026, will be showcasing a product lineup, including new models, from its excavator and backhoe loader ranges at booth numbers C5-C6.

At SaMoTer with its most popular models in the European market

HİDROMEK is preparing to showcase its excavator and backhoe loader models that have attracted interest in the regional market at its SaMoTer 2026 booth. In addition, two new crawler excavator models will be on display at the HİDROMEK stand.

Two new additions to HİDROMEK's line of crawler excavators, distinguished by their short-tail designs, will be on display at this fair. HMK 85 SR, in the 9-ton class, and **HMK 235 LCR**, HİDROMEK's largest model featuring a short swing radius, will reflect HİDROMEK's power in narrow spaces, urban environments, and sensitive work sites.

HMK 62 T mini crawler backhoe loader, which recently joined K4 Series with its new and improved specifications, will also be on display for visitors at SaMoTer 2026. With its new series design, HMK 62 T has taken a significant step forward in both operator comfort and machine durability and has been well-received at the events where it has been exhibited so far.

“Italy is one of the markets where we have a strong presence”

Gizem Ulaş, HİDROMEK’s Export Area Manager for Italy, spoke about the company’s export activities in the region and its booth at SaMoTer 2026.

“At HİDROMEK, we view Europe as a key region at the core of our export strategies. We have strong, well-established, and growing dealer networks in many countries across the region. Italy is one of the markets we

prioritize and where we have a strong presence. Currently, we are working with 13 authorized dealers in Italy, whom we believe best reflect HİDROMEK's strength.

Events like SaMoTer are also of great importance for the continuity of our export activities in various markets. Such events, which enable us to meet with both our customers and dealers in the region, also serve as an important platform for potential partnerships.

We invite everyone to visit our booth numbered C5-C6 at Veronafiore to see our new models and more from our excavator and backhoe loader product lines."
