DEUTZ completes acquisition of generator manufacturer Maxi Trust

10 June 2026 by DEUTZ AG

- DEUTZ has completed the acquisition of Maxi Trust Power Ltda, a prominent Brazilian generator manufacturer.
- This acquisition expands DEUTZ's presence in Latin America and broadens its decentralized energy supply solutions portfolio.
- The deal is expected to add about €40 million in profitable revenue, supporting DEUTZ's target of €500 million energy sector revenue by 2030.

- Previous acquisitions in Europe and the Americas have already positioned DEUTZ as a leading provider of emergency and generator power systems globally.
- Additional profitable revenue of around €40 million expected
- DEUTZ Energy expands product portfolio and market access

DEUTZ, a provider of innovative and sustainable mobility and energy solutions, yesterday completed the acquisition of 100% of the shares in Maxi Trust Power Ltda. The signing took place last week. The Brazilian manufacturer of gas and diesel generators is one of the leading providers in Brazil and Latin America. With the completion of the transaction, DEUTZ is expanding its global network as a provider and system integrator of decentralized energy supply solutions, a market that is experiencing strong growth worldwide.

„We are pleased to officially welcome Maxi Trust to DEUTZ,” says DEUTZ CEO Dr. Sebastian Schulte. „The company has a strong market position in Brazil and is an excellent complement to our existing energy business. Together, we want to seize the growth opportunities that arise and further expand our activities in the field of decentralized energy supply.”

DEUTZ expects the acquisition to generate around €40 million in additional profitable revenue. This will help drive revenue in the energy sector to around €500 million by 2030 through organic and inorganic growth.

With the acquisition of Frerk Aggregatebau, completed in February 2026, DEUTZ is already one of Europe’s leading providers of high-end emergency power systems, which are primarily used in critical infrastructure such as data centers. Through the acquisition of Blue Star Power Systems in 2024, DEUTZ has already established itself in the American generators market, too.
