Powerscreen Premiertrak R450 on show with PowerX Equipment at Hillhead 2026

19 June 2026 by Powerscreen (Terex)

- Powerscreen will showcase the Premiertrak R450 jaw crusher at Hillhead 2026 via its UK rental partner, PowerX Equipment.
- The Premiertrak R450 is a high-capacity machine capable of processing up to 450 tonnes per hour, designed for demanding heavy-duty environments.
- PowerX Equipment operates a fleet of over 30 machines, offering flexible rental and contract processing solutions across quarrying, mining, demolition, and recycling sectors.

- **The rental service provides customers with modern equipment access without upfront investment, supporting short-term needs and machinery replacement.**

Powerscreen®, a leading provider of mobile crushing, screening and conveying equipment, will be represented by its UK rental provider, PowerX Equipment, at Hillhead 2026, where the company will present the Premiertrak R450 jaw crusher on Stand X7.

PowerX Equipment is the official rental provider for the Powerscreen range in England and Wales and will use the event to demonstrate its capabilities in delivering flexible equipment rental and contract aggregate processing solutions across a range of applications.

Operating a fleet of more than 30 machines, PowerX Equipment supports customers in quarrying, mining, demolition and recycling, offering scalable solutions to meet varying project demands. In addition to its UK operations, the business is also an authorised Powerscreen distributor in West Africa, with offices and aftersales support in Ghana, Nigeria and Ivory Coast.

Visitors to Stand X7 will have the opportunity to see the Premiertrak R450, a high-capacity jaw crusher designed for demanding environments. The machine can process up to 450 tonnes of material per hour and is suited to operations requiring reliable performance in heavy-duty applications.

PowerX Equipment's presence at Hillhead will focus on how its hire fleet and contract processing services help customers maximise output while maintaining operational flexibility. Its rental offering provides access to modern equipment without the need for upfront capital investment, while also supporting short-term capacity requirements or the replacement of ageing machinery.

Luke Talbot, Managing Director, Power X Equipment said, "As the proud official rental provider for the Powerscreen range of crushing and screening equipment in England and Wales, we will be demonstrating our machine hire and contract processing solutions at Hillhead 2026. Whether you need additional capacity on site or are replacing an ageing, unreliable machine, we welcome you to visit Stand X7, take a closer look at the machine and speak with the team."

Hillhead 2026 provides an opportunity for Powerscreen and its distributors to engage directly with customers and demonstrate how flexible equipment and contract processing services can support efficient on-site material processing.
