

During the Apex show in Amsterdam at the end of June Altrex showcases a number of products.

30 April 2014 by Altrex

Two of the products Altrex will be showcasing are the 4400 POWER folding/ rolling tower and Safe-Quick® Guardrail Rolling Tower. The products are summarized below.

4400-POWER

Within the 4000 series Altrex offers the 4400-POWER folding/rolling tower for both interior and exterior work. This compact folding/rolling tower has basic dimensions of 0.75 x 1.85 m.

- The platforms can be adjusted to a variety of working levels, allowing work to be carried out at various heights with ease
- The hinge system makes the folding scaffold easy to fold and unfold
- The 4400-POWER can be moved simply through standard door openings
- The storing the 4400-POWER is easy and compact
- Wooden platforms with anti-slip profile and windlock security system provide extra security
- Comfortable access, because the rungs are equipped with an anti-slip profile and a rung distance of 28 cm
- Extendable with 4000 series components to a working height of 7.80 m.
- Optional: separately supplied set of collar tubes enables extension.

The 4400-POWER is also available with Safe-Quick®.

Safe-Quick® Guardrail Rolling Tower

With the safe-Quick GuardRail Rolling Tower, Altrex offers a world-class innovation which is even safer and quicker to assemble and can even be applied façade-free. Safe-Quick® meets the increasingly tighter European and national regulations regarding the safe assembly of Rolling Towers. Safe-Quick is available for all Altrex scaffolds from the 4000 series and 5000 series.

Even safer: always protected and correctly assembled

- Permanent railing in Rolling Tower (no temporary support railing)
- Before accessing platform, there is always protection all around (also during assembly)

- With Safe-Quick® GuardRail Rolling Tower, automatic correct assembly
- Risk of faulty assembly is minimised
- To be placed in the middle of the frame, which means a single platform can also be created for wide scaffolds
- Rolling Tower provided with strength and stability calculation in accordance with EN 1004
- Mobile Safety® QR-code for user instructions is included

With Safe-Quick®, scaffolds are even quicker and more easy to assemble with fewer parts

- Quicker assembly and disassembly
- Safe-Quick® GuardRail easy to assemble by 1 person
- Uniquely balanced design: 1 part replaces many braces
- At assembly it is easy to raise in transport setting
- Light-weight
- Compact to transport

Also available façade-free

- No braces on façade side (if no more than 15 cm from the façade)
- Ideal for everyone who has to work on façades
- Free working without obstructive braces

Stand no: 230
