22 June 2014 by Els Makine

ELSÝSAN GROUP OF COMPANIES was established in 1979's and ELS Makine is located within the structure of ELSÝSAN GROUP and has facilities in Bursa and Ýstanbul. ELS Makine which entered the machine industry with an investment of \$ 10 million in 2010, today produces access platforms with different features between the heights of 5 meter to 27 meter. More than 200 staff are employed in manufacturing operations, which takes place in 14 thousand square meters closed area. ELS Makine that makes 4-5 new models ready, for mass production per year with the R & D team that consists of 12 people, has a manufacturing facility equipped with advanced technology which is just established for the Access business. Daily production capacity of ELS Makine's facility that contains the features such as laser cutting machines, 5-axis welding robots, CNC lathes and machining centers, wet paint, powder coating, sandblasting, is 7 units. ELS Makine is exporting to Europe, North Africa, Russia, the Middle East and Turkic Republics, in addition to the activities in Turkey. Nowadays, ELS Makine is making 50 percent export-oriented production.

ELS Makine's target is to be among the global market leaders in the industry. ELS brand platforms that satisfies the quality expectation, began to impose itself in the international rental sector. ELS Makine management is aware of the utmost importance; of the strong technological infrastructure and quality as well as of promotional activities, in order to become a global brand. Therefore, each year ELS Makine attends approximately 6 international exhibition and also subvents various sectoral conferences.

ELS Makine is currently operating through its partners in some countries such as Germany, the Netherlands, France, Switzerland, Bulgaria, Russia, Belarus. ELS Makine management that believes the distributor network makes easier to reach the end users and also it provides advantages in service quality; is preparing to make new agreements in some other countries in 2014.
